Defect Summary

Deposit Module Displays HTTP 500 Error After Successful Submission

Test ID

TC_DEP_0010

Test Case Name

Validate Successful Deposit Transaction

Module Name

Deposit Module

Description

After entering a valid account number, deposit amount, and description, the system displays an HTTP 500 Internal Server Error instead of completing the deposit transaction successfully.

Reproducible Steps

1. Login to Guru99 Bank.
2. Navigate to Deposit.
3. Enter valid Account Number.
4. Enter valid Deposit Amount.
5. Click Submit.
6. Observe system response.

Expected Result

Deposit transaction should be completed successfully and a confirmation message should be displayed.

Actual Result

Validate Date of Birth Field

Module Name

New Customer Registration

Description

The application allows users to enter a future date in the Date of Birth field and successfully creates the customer account.

Reproducible Steps

1. Login to Guru99 Bank.
2. Navigate to New Customer.
3. Enter valid customer details.
4. Enter DOB as 12-02-2029.
5. Submit the form.

Expected Result

System should reject future dates and display an appropriate validation message.

Actual Result

Customer is created successfully with a future birth date.

Rank:	0 00027:		
Start date:	08/Jun/26		
Sprint:	GB Sprint 1		

Description

When creating a new customer, the Date of Birth field accepts a future date (e.g., 25-08-2029). After submitting the form, the customer is registered successfully without any validation error. A customer's date of birth should always be a past date, and future dates must be rejected.

Steps to Reproduce

1. Login to Guru99 Bank application.

2. Navigate to **New Customer**.

3. Enter valid customer details.

4. In the **Date of Birth** field, enter a future date (e.g., 25-08-2029).

5. Fill all remaining mandatory fields.

6. Click **Submit**.

Expected Result

The system should display a validation message such as:

"Future Date of Birth is not allowed"

and prevent customer creation.

Actual Result

Customer is created successfully with a future Date of Birth.

Defect Summary

Weak Passwords Are Accepted During Customer Registration

Test ID

TC_CUST_009

Test Case Name

Validate Password Length Requirement

Module Name

New Customer Registration

Description

The application accepts weak passwords such as "12345" without enforcing minimum password complexity requirements.

Reproducible Steps

1. Login to Guru99 Bank.
2. Navigate to New Customer.
3. Enter valid customer details.
4. Enter password as "12345".
5. Submit the form.

Expected Result

System should reject weak passwords and display a validation message.

Actual Result

Customer registration is completed successfully.

Defect Summary

Invalid City Name Is Accepted

Test ID

TC_CUST_013

Test Case Name

Validate City Field Input

Module Name

New Customer Registration

Description

The application accepts non-existent city names such as "ABCD" and successfully creates customer records.

Reproducible Steps

1. Login to Guru99 Bank.
2. Navigate to New Customer.

3. Enter city as "ABCD".
4. Fill all remaining mandatory fields.
5. Submit the form.

Expected Result

System should validate city names and reject invalid values.

Actual Result

Customer is created successfully with an invalid city name.

Sprint:	GB Sprint 1

Description

During customer registration, the City field accepts arbitrary text values such as "ABCD" and does not validate whether the entered city actually exists. The system successfully registers the customer with the invalid city name, resulting in inaccurate customer address data.

Steps to Reproduce

1. Login to Guru99 Bank.
2. Navigate to **New Customer**.
3. Enter valid customer details.
4. In the **City** field, enter an invalid value such as:
 - ABCD
 - XYZXYZ
 - TESTCITY
5. Fill all remaining mandatory fields with valid data.
6. Click **Submit**.

Expected Result

The system should:

- Validate the city name against valid city data, or
- Display an error message such as:
"Please enter a valid city name."

Actual Result

The application accepts the invalid city name and successfully creates the customer.

Generated at Thu Jun 11 11:37:30 UTC 2026 by Himanshu Singh using Jira 1001.0.0-SNAPSHOT#100291-rev:fc7a4733e5b961216b9bf0a12338994ae0045171.

Defect Summary

Invalid State Name Is Accepted

Test ID

TC_CUST_012

Test Case Name

Validate State Field Input

Module Name

New Customer Registration

Description

The application accepts random values such as "hbgfds" in the State field and successfully creates customer records.

Reproducible Steps

1. Login to Guru99 Bank.
2. Navigate to New Customer.
3. Enter State as "hbgfds".
4. Fill all mandatory fields.
5. Submit the form.

Expected Result

System should validate state names and reject invalid entries.

Actual Result

Customer registration succeeds with an invalid state value.

Start date:	08/Jun/26		
Sprint:	GB Sprint 1		

Description

While creating a new customer, the State field accepts invalid values such as "hbgfds" or "abcd". The application successfully registers the customer without validating whether the entered state is a valid state name. This can lead to inaccurate customer records and poor data quality.

Steps to Reproduce

1. Login to Guru99 Bank.
2. Navigate to **New Customer**.
3. Enter all mandatory customer details.
4. In the **State** field, enter an invalid value such as:
 - abcd
 - hbgfds
 - xyzxyz
5. Submit the form.

Expected Result

The system should:

- Reject invalid state names, or
- Provide a dropdown/list of valid states only.

Example validation message:

"Please enter a valid state name."

Actual Result

The application accepts invalid state names and creates the customer successfully.

DEFECT REPORT 6:-

Defect Summary

Customer Name Field Displays Incorrect Validation Message for Space Character

Test ID

TC_CUST_007

Test Case Name

Validate Customer Name Field with First Name and Last Name

Module Name

New Customer Registration

Description

While creating a new customer, entering a valid customer name such as "Himanshu Singh" triggers the validation message "Numbers are not allowed". A space between the first name and last name is a valid input and should be accepted by the application. The validation message is misleading because no numeric characters are entered.

Reproducible Steps

1. Login to Guru99 Bank application.
2. Navigate to New Customer.
3. Enter "Himanshu Singh" in the Customer Name field.
4. Observe the validation message displayed beside the field.

Expected Result

The application should accept customer names containing spaces and should not display any validation message.

Actual Result

The application displays the validation message "Numbers are not allowed" even though the input contains only alphabetic characters and a valid space character.
